## *Expert Tips*

- Have conversations—those that know you best will hold up the mirror to show you where your biggest impact might be.
- Think small actions for massive impact. Huge actions are tough to get off the ground. Consistent, small actions change lives. Think of your contribution philosophy as how can you step up rather than how you can create a revolution—the revolution will follow!
- Invest that coffee money in backing someone doing great things in an area you believe in. Your support will be felt far beyond the dollar value.
